Annual Index Volume 7, 1970

January 1–36
April 37–64
July 65–104
October 105–136

SUBJECT INDEX

Bearing Plates
Design of Steel Bearing Plates—*Fling* 37

Bridges
Analysis of Curved Girder Bridges—*Culver, Brogan and Bednar* 10
Preliminary Design of Curved Bridges—*Heins and Siminou* 50

Columns
Calculation for Beam-column Design—*Ting* 62
Temperature Effects on Tall Steel Framed Buildings–Part 1, Response of Steel Columns to Temperature Exposure—*McLaughlin* 105

Composite Design
Composite Open-Web Steel Joists—*Tide and Galambos* 27
Design of Composite Beams with Formed Metal Decks—*Fisher* 88

Computer Solutions
Minimum Cost Structures by Dynamic Programming—*Moses and Gable* 97

Connections
Maximum A325 and A490 Bolt Loads at a Glance—*Stetina* 75

Curved Girders
Analysis of Curved Girder Bridges—*Culver, Brogan and Bednar* 10
Straight-Element Grid Analysis of Horizontally Curved Beam Systems—*Weissman* 41
Approximate Torsional Analysis of Curved Box Girders by the M/R Method—*Tung and Fountain* 65

Girders
Homogeneous and Hybrid Girder Design in the AISC Specification—*Milek* 2
Analysis of Curved Girder Bridges—*Culver, Brogan, and Bednar* 10
Approximate Torsional Analysis of Curved Box Girders by the M/R Method—*Tung and Fountain* 65

Multistory Buildings
Preliminary Wind Analysis of Multistory Bents—*Ben-Arroyo* 16
Temperature Effects on Tall Steel Framed Buildings
Part 1—Response of Steel Columns to Temperature Exposure—*McLaughlin* 105
Part 2—Structural Analysis—*West and Kar* 110
Part 3—Design Considerations—*Khan and Nassetta* 121

AUTHOR INDEX

Bednar, David (see Culver, Charles)
Ben-Arroyo, Abraham
Preliminary Wind Analysis of Multistory Bents 16
Brogan, Darryl (see Culver, Charles)
Culver, Charles, Brogan, Darryl, and Bednar, David
Analysis of Curved Girder Bridges 10
Fisher, John W.
Design of Composite Beams with Formed Metal Deck 88
Fling, Russell S.
Design of Steel Bearing Plates 37
Fountain, Richard S. (see Tung, David H. H.)
Galambos, T. V. (see Tide, R. H. R.)
Goble, George (see Moses, Fred)
Heins, Conrad P., Jr., and Siminou, Javid
Preliminary Design of Curved Bridges 50
Kar, A. K. (see West, H. H.)
Khan, Fazlur R. and Nassetta, Anthony F.
Temperature Effects on Tall Steel Framed Buildings—Part 3, Design Considerations 121
McLaughlin, E. R.
Temperature Effects on Tall Steel Framed Buildings—Part 1, Response of Steel Columns to Temperature Exposure 105
Milek, W. A.
Homogeneous and Hybrid Girder Design in the 1969 AISC Specification 2
Moses, Fred and Goble, George
Minimum Cost Structures by Dynamic Programming 97
Nassetta, Anthony F. (see Khan, Fazlur R.)
Siminou, Javid (see Heins, Conrad P., Jr.)
Stetina, Henry J.
Maximum A325 and A490 Bolt Loads at a Glance 75
Tide, R. H. R. and Galambos, T. V.
Composite Open-Web Steel Joists 27
Ting, Ea-Lu
Calculator for Beam-column Design 62
Tung, David H. H. and Fountain, Richard S.
Approximate Torsional Analysis of Curved Box-Girders by M/R Method 65
Weissman, Herbert A.
Straight Element Grid Analysis of Horizontally Curved Beam Systems 41
West, H. H. and Kar, A. K.
Temperature Effects on Tall Steel Framed Buildings—Part 2, Structural Analysis 110

Computer Program for Column Design

To help meet the more sophisticated needs of today's engineering profession, a computer program based on the 1969 AISC Specification is now available for the design of steel columns. This new design aid offers a valuable means to utilize the computer to speed selection of the most efficient, economical column sections for a structure and to reduce design costs.

The program was developed by AISC in cooperation with the Committee of Structural Steel Producers and the Committee of Steel Plate Producers of American Iron and Steel Institute.

For further information, contact your local AISC regional engineer, or write to AISC, 101 Park Avenue, New York, N. Y. 10017.
